VSC

VIDEO SERVICES CORPORATION

Video Services Corporation (VSC), established in 1979, is the leading video, audio services and systems engineering organization. VSC is comprised of 14 independently operated companies serving every facet of the video field, including the broadcast, cable, industrial/corporate, educational, medical, advertising, and home entertainment industries.

The VSC group of companies includes: A.F. Associates, Inc.; Associated Images Limited; Atlantic Satellite Communications, Inc.; Audio Plus Video International, Inc.; Cassette Dub, Inc.; Compton Capital Corporation; Martin Audio/Video Corporation; Video Dub, Inc.; Video Services Entertainment; Videotape Distributors, Inc.; VRI Scharff Rentals; VSC Post Production, Inc.; VSC Presentations; and Waterfront Communications Corporation.

more...

A.F. Associates, Inc. designs, engineers, fabricates and installs video systems including TV studios, editing and color correction suites, duplication facilities, mobile production vans, cable network control and program origination centers, sports arena production and camera systems and special purpose TV installations. AFA is also the exclusive manufacturer's representative for a number of high-technology video products, providing sales and marketing services and full technical product support.

Associated Images Limited opened in September 1989 with the installation of a Quantel Graphic Paintbox for developing high definition design and image retouching. Clients include CBS Fox Video, Atlantic Records, Lintus Advertising and graphics houses like The Hub Graphics Co.

Atlantic Satellite Communications, Inc. provides comprehensive satellite services, ranging from full-time programs distribution to the broadcast, cable and hotel industries, to business video and data transmissions. For the entertainment industry, ASCI offers facilities for covering ad hoc-network live events, satellite distribution for syndicated TV programs and pay-per-view events, studio production, tape editing and standard conversion, encryption and tape playback.

Audio Plus Video International, Inc., an international videotape facility, specializes in digital standards conversion, duplication and film-to-tape transfer. APVI provides international video services to the entertainment, music and corporate industries. The services include PAL editing and audio relay and dubbing.

Cassette Dub, Inc., a videocassette duplication facility, provides large volume duplication to the corporate, industry and educational markets.

Compton Capital Corporation, VSC's equipment lease financing company, specializes in providing equipment acquisition capital to the video, audio, telecommunications and medical markets.

more...

Martin Audio/Video Corporation, founded in 1962, serves the most sophisticated users, keeping in stock an inventory of the most desirable lines of equipment. Martin Audio operates the largest pro audio parts department in the U.S., including over 100 lines of equipment, and is the exclusive New York area supplier for some of the most prominent brands of broadcast and recording hardware.

Video Dub, Inc. provides specialized services for the duplication and distribution of television commercials, syndicated television shows and industrial programs. VDI's facilities also include editing, color correction and film-to-tape transfer capabilities.

Video Services Entertainment was established in 1989 as a full-service production and marketing company to provide leisure time video programs to the consumer. VSE also develops long and short form programming for cable and broadcast television, and produces special events programs and motion pictures for the pay-per-view and theatrical markets.

Videotape Distributors, Inc. is VSC's authorized wholesale/distributor of blank professional videotape, audio tape, magnetic media accessories and other associated tape products.

VRI Scharff Rentals, an audio, video, and presentation equipment rental company, offers a diversified inventory of equipment, as well as specially outfitted remote location mobile units for the TV industry.

VSC Post Production, Inc. a state-of-the-art post-production facility, provides the equipment and personnel required to perform film-to-tape color correction, editing, graphics and special effects for commercials, programming, corporate, industrial and network clientele.

more...

VSC Presentations, formally a division of VRI Scharff Rentals, was formed in November 1989 to provide presentation services and equipment for corporate and association meetings and events, teleconferences and exhibitions, and to produce "Business Theater." Business Theater brings theatrical elements to the meeting including lighting, staging, multi-image presentations, videowalls, video projectors, and computer data displays. Other elements are set designs, props, scripts, music and indoor pyrotechnics.

Waterfront Communications Corporation is a Manhattan-based communications services company which provides satellite transmission facilities, including videoconferencing and productions facilities, to the broadcast and cable industries, and to Fortune 500 companies. Founded in 1983 and acquired by VSC in 1989, Waterfront engineered and installed microwave and fiber optic connections between long-haul communications pathways and has established its own connections to the terminals of national and international carriers.
